

# High Performance RESIDENTIAL AIR-CONDITIONING 2018

**SR**series

Residential Air Conditioners

**50Hz**  
18R01E-A

## Elegant Timeless Design

The ZSX and ZS series air-conditioners have been stylishly designed with rounded contours that fit beautifully into any of Europe's diverse interior settings. The design was created by the Italian industrial design studio Tensa srl, based in Milan, to respond to a broad spectrum of local user needs.

ZSX series

## Now Available (R32: The next generation refrigerant)

R32 is the next generation refrigerant that boasts nearly 70% lower Global Warming Potential Rate than R410A. Due to its superior qualities R32 offers amazing energy efficiency benefits. It has a potential refrigerating effect 1.5 times that of R410A meaning it needs less energy to achieve the desired temperature and requires less refrigerant volume to operate.

# Leading energy efficiency and high reliability with Mitsubishi Heavy Industries advanced technology.

What kind of solution Mitsubishi Heavy Industries Air-Conditioner can offer?

- Keep comfort by quick cool-down/warm-up
- Energy saving for sustainable society
- Comfort Interior
- Reliable electrical appliance for long term use

Mitsubishi Heavy Industries advanced technology can provide a variety of solutions.

Design award for Mitsubishi Heavy Industries SRK-ZSX air conditioning unit

Mitsubishi Heavy Industries has been awarded the 2017 Silver A' Design Award in the 'Engineering and Technical Design' category for its SRK-ZSX Diamond Series air conditioning unit. It was created to meet the demanding expectations of the European air conditioning market.

## Energy Saving

High energy saving with comfort air conditioning ; provides the user with multiple solutions between comfort and energy savings.

All the models can achieve high energy efficiency by use of Mitsubishi Heavy Industries technology, such as high performance compressor, DC PAM inverter technology.

## Quiet and Comfort

Mitsubishi Heavy Industries Thermal Systems offers a unique modest air conditioner; quiet and comfortable which provides precise air flow and capacity control.

## Clean Air

Allergen clear operation cleans air using a control scheme unique to Mitsubishi Heavy Industries Thermal Systems. Furthermore, a wide array of air purification filters and self-cleaning operation helps keep the room air clean.

# HIGH EFFICIENCY

## Consideration for the Environment

Several radical design changes and engineering developments have brought about a vast improvement in energy efficiency and environmental protection.

### High efficient Performance: up to Class A +++

Mitsubishi Heavy Industries Thermal Systems classes its entire range with seasonal domestic energy factors that display energy ratings from A + to A +++. Important energy savings in both cooling mode and heating are achieved thanks to its DC PAM Inverter technology and DC twin rotary compressor. (ZSX series)

Higher Energy class (SEER/SCOP)

### QUICK & HIGH EFFICIENCY Control

#### DC PAM inverter

An inverter driven system has a number of performance advantages over a constant speed system. For example, its variable compressor outputs can ensure quick heating after a startup and attain a set temperature more quickly.

The air conditioner can then slow down its compressor speed to save energy, keeping comfortable conditions. Moreover, the compressor is DC driven, so it provides higher performance.

DC compressor motor

Utmost comfort and energy efficiency achieved with large output power and control optimization

### Vector Inverter Control

The inverter control, with the advanced vector control technology, functions at high efficiency.

- Smooth operation from low speed to high speed
- Smooth Sine Voltage Wave form are attained
- Energy efficiency is further improved in low speed range

### HIGH EFFICIENCY

#### DC Twin Rotary Compressor

The newly developed DC twin rotary compressor performs highly efficient operation under the wide range conditions from low speed to high speed.

Besides low vibration, low sound level and high efficiency can be also achieved by the optimization of mechanical parts dimension and by the application of high power Neodymium motor.

Featured on all models of ZSX series

# ENERGY SAVING

## Eco Operation

Automatic energy saving control is done by detecting human activity. Human activity is detected by infra-red sensor which is installed in the unit. Air conditioner adjust its cooling/heating capacity according to low/high demand. Economy Cooling operation, Air conditioner controls its capacity lower and goes into energy saving control when low activity is detected. Economy Heating operation, Air conditioner controls its capacity lower and goes into energy saving control when high activity is detected. When the sensor detects that no people are present in the room, the unit will automatically reduce the power used to a moderate level after approximately 15 minutes and return to normal operation once people return to the room.

### In a cooling operation

It is set to moderate operation when there is little movement in the room.

### In a heating operation

It is set to moderate operation when there is a lot of movement in the room.

## Auto Off

Air conditioner stop operation and goes to "stand-by" mode after 1-hour absence. It turns ON again when human activity is detected within 12-hour, or turned OFF after 12-hour absence.

\*Can also be set to turn OFF after two hours.

### Absent

Moderate operation

It suppresses the power when there is nobody present in the room.

### After 1-hour

Stand-by

You do not need to worry, even if you forget to turn off the power. Air-conditioner keeps stop until human activity is detected.

### Come back to room

Normal operation turn ON again

Automatically operates in the preset mode if you return to the room in twelve hours.

## Fuzzy Auto Operation

The temperature and humidity sensors check room conditions.

The unit automatically controls the operation mode and the setting temperature to operate efficiently.

Operation mode and cooling/heating capacity is controlled automatically according to one setting temperature.

Fuzzy auto operation offers automatic comfort temperature control even if weather condition changes quickly.

\* This page is mainly described ZSX series.

# AIR FLOW

## Jet Technology Quiet Air Flow & Long Reach

We used the same aerodynamic analysis technology as used in developing jet engines.

CFD (computational fluid dynamics), used in blade shape design of jet engines, has been applied to the design of air channels in air conditioners to develop the ideal air channel system (air circulation). The jet air stream generated by this air channel system can bring large volume air without consuming much power. While at the same time, it delivers a uniform gentle breeze to every corner of the room.

(C)Mitsubishi Aircraft Corporation

## Long Reach Air Flow

Long reach air flow is realized by Jet technology. Good for large living rooms and shops, which increases comfort.

## Double Flap Large and Small

Double flaps can control optimized air flow, horizontal and long reach air flow in cooling, strong and downward air flow in heating, which can produce comfort room temperature condition.

## 3D AUTO Vertical + Horizontal

### Multi motors make 3 independent controls

3D AUTO is one touch programmed and multi motors make three independent air flow controls.

The uniform and quiet airflow can be delivered to every corner of the room, achieving economical operation and minimizing energy loss.

Programmed air distribution

### Programmed 3D AUTO

Thanks to automatic control of air flow volume and air flow direction, comfortable air conditioning of the entire room can be done effectively.

The cooled air flows directly to the ceiling in cooling operation mode, not directly at the occupants of the room. Comfort cooled air flow comes via the ceiling like a cool breeze. In the heating mode, warm air flow can be sent down to the floor directly. The warm air then spreads along the floor achieving optimum comfort.

### Horizontal swings in 8 directions

The airflow direction from the right and left louvers can be controlled individually. Eight different air flow patterns can be selected.

\* This page is mainly described ZSX series.

# CLEAN AIR

This is the original and only technology to control the temperature and humidity for inactivating allergens

## Allergen Clear Operation

This can be activated by pressing the "allergen" button on the remote control and lasts 90 minutes before stopping automatically. It neutralizes all the bacteria collected on the surface of the anti-allergenic filter thanks to its sophisticated interaction between temperature and humidity controls.

## Self Clean Operation

Self clean operation is operated for 2 hours after the unit has stopped its normal operation.

The indoor unit is dried up and the growth of mold is restrained.

Users can select whether this mode is utilized or not.

### Situation of mold after one week

#### When you don't execute "Self Clean Operation"

#### When you execute "Self Clean Operation"

## Allergen Clear Filter

Enzyme + Urea deactivates allergens and bacteria.

The allergen clear filter breaks down the pollen<sup>\*1</sup>, lice<sup>\*1</sup>, and allergens that live on cat skins, etc. and deactivates them. The secret of deactivation is the Enzyme-urea compound. It deactivates not only allergens but also all kinds of bacteria<sup>\*2</sup>, molds and viruses<sup>\*3</sup>. Even if allergens and bacteria, etc. fly of the filter, they are deactivated, so the air in your room is kept fresh.

# Structure of Preventing Dirt

## Always keeping the indoor unit clean

The fan has undergone anti-microbial treatment to resist mold and germs, making the system clean and safe. Foul odours and molds, etc. which can occur when an air conditioning system is not in operation are prevented.

### ● *Aspergillus niger* IFO6341

Testing Authority: Japan Food Analysis Center

Test Report No.: 104034022-002

Tests were conducted with reference to the antimicrobial strength tests in JIS Z 2801 "Antimicrobial Products-Antimicrobial Test Method" -5.2

Antimicrobial Effects: Test Methods for Plastic Products, etc.

without Anti-microbial      with Anti-microbial

Comparison of growth of bacteria and mold on fan surfaces (microscopic image)

In tests conducted at the Mitsubishi Heavy Industries Nagoya Research Lab, 24 hours after contact with bacteria, cultured on agar media.

## Photocatalytic Washable Deodorizing Filter

It will keep the air fresh by deodorizing the molecules causing odour. Its deodorizing power can be restored by washing with water and drying under the sun, as such it is a Recycling deodorizing filter capable of repeat use.

### Used in models

Filter	Indoor Unit	SRK-ZSX	SRK-ZR	SRK-ZS
Allergen Clear Filter		1pc	1pc	1pc
Photocatalytic Washable Deodorizing Filter		1pc	1pc	1pc

\* This page is mainly described ZSX series.

# COMFORT & CONVENIENCE

## High Power Operation

### *In a cooling operation*

This operation mode delivers powerful cool air to cool the room quickly.

It blows powerful cool air when you want to be cooled down after bathing or returning home on a hot summer day so that you can enjoy a cool sensation immediately. The air conditioner automatically returns to the previous operation mode in 15 minutes to prevent the room from being cooled excessively.

### *In a heating operation*

This operation mode warms the whole room from the vicinity of the air conditioner to your feet.

It warms up the room promptly when you want to be warmed such as getting out of bed or returning home during the winter seasons. The air conditioner automatically returns to the previous operation mode in 15 minutes to prevent the room from being warmed excessively.

## Silent Operation

When Silent operation is set, the maximum pressure level of the outdoor unit will be 3dB(A) lower than standard nominal level (45dB(A) or less).

The compressor speed is set at a lower range than that of nominal operation, operating at 60% of nominal capacity.

Maximum fan speed of outdoor unit is set lower than nominal operation.

## Night Setback Operation

During cold seasons, room temperatures can be maintained at a comfortable level even while the room is unattended.

The air conditioner keeps the temperature at 10°C.

## Weekly Timer Operation

Up to 4 programs with timer operation (ON-TIMER / OFF-TIMER) are available for each day of the week.

Maximum 28 programs per week can be set.

Once set, the timer operation will repeat the same program every week unless otherwise canceled.

## Sleep Timer

Too much cooling/heating is not necessary when people go to sleep. This function achieves moderate cooling/heating by adjusting its capacity and more energy saving as well.

## Pre-Operation to comfort start-up

Air conditioner controls room temperature to achieve comfort at the "set time" by 60-minutes pre-operation. This is convenient when you wake up and return home at a predetermined time. In ON-TIMER operation, the unit starts the operation a little earlier, so that the room can approach optimum temperature at ON time.

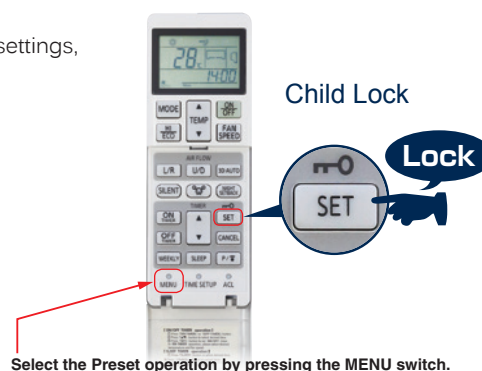

## Preset Operation

The Preset Operation features allows customised temperature and airflow settings, which will deliver ultimate comfort with one simple touch of the button.

## Child Lock

Blocks the unit preventing tampering and inadvertent operations. This function is useful for families with young children.

## LED Brightness Adjustment

Brightness of the LED display can be adjusted to suit. (Applied for ZSX & ZS series)

## Installation Positioning

The air flow direction can be set to suit the rooms configuration.

EU/EEA market only

airconwithme

airconwithme Wifi Adaptors

Model : AM-MH-01

\* This page is mainly described ZSX series.

# COMFORT & CONVENIENCE

## Wide Range of Operation

Our new advanced technology has expanded the heating and cooling operation range.

This permits installation of the units considering a heating and cooling operation under a low temperature condition down to  $-20^{\circ}\text{C}$ . (ZSX series)

**ZSX series**

\* For the capacities under low temperature conditions, refer to technical manual.

**All models (except ZSX series)**

## Long Piping Length

ZSX series supports a piping length of up to 30m to give design flexibility.

## Installation of air-conditioners for a three-story house is available with long piping length

Suitable installation space can be found easily for outdoor units with long piping length. As one outdoor unit is necessary for a three-story house the space required for installation is relatively small so the unit can be obscured in place. Indoor units can be installed far apart such as on the first floor and as well as the third floor.

< EU/EEA market only >

airconwithme

Optional WiFi Control

### YOUR AIR CONDITIONER ALWAYS WITH YOU

Control the Air Conditioning units through airconwithme® App in a very intuitive way. The App allows an easy and intuitive WiFi AC Control from anywhere via your smartphone or tablet.

# HIGH TECHNOLOGIES

## Our Latest Technologies (ZSX series)

### [ Outdoor unit ]

#### Propeller fan

Matching a propeller fan with a fan motor has been optimized in order to keep the same capacity as that of previous models with less electrical consumption. Synergy effect with leaf grill has increased efficiency by 5% and quietened the sound.

Serration fan

#### Coated PCB

The printed wiring board of the outdoor unit is coated. It lasts long having a tolerance for humidity.

#### Heat exchanger

Thanks to changing fin configuration from flat sheet to M shape fin, efficiency has increased by 10%. This high dimensional structure provides optimum balance of heat transfer and airflow.

#### Leaf shape grill

The radial shape grill has been developed in order to send airflow efficiently out unit along the grill. Decreasing the load for motor and propeller fan leads to greater energy efficiency and contributes to quieter sound.

#### Superior corrosion resistance hot dipping steel sheet

Superior corrosion resistance hot dipping steel sheet is applied at the base of outdoor units. It has superior corrosion resistance and scratch resistance properties compared to conventional materials.

#### DC Motor

DC fan motor produces high efficiency & high power

#### Three Sensors

Control of room temperature and humidity is very important for people to live a comfortable life. Use of three sensors to control indoor temperature, indoor humidity and outdoor temperature enable unit to obtain optimum air-conditioning.

Sensor for indoor temperature and humidity

Sensor for outdoor temperature

### [ Indoor unit ]

#### Heat exchanger

Our optimal combination of fin configuration and copper tube has maximized airflow volume without expanding indoor unit's size in width. The heat exchanger efficiency rate has been drastically improved by 33% compared with that of previous models. Fin can maximize airflow volume and save energy simultaneously.

#### Movable air inlet panel

Applying a movable air inlet panel, minimization of air resistance and advanced design are realized.

\* This page is mainly described ZSX series.

# FUNCTIONS

## Energy saving

### Fuzzy Auto Mode

Automatically, the unit determines its operating mode and temperature setting based on a fuzzy calculation, and adjusts the inverter frequency.

### Human Sensor

This sensor detects human motion activity and movement and inhibits unnecessary operation when not required.

### Eco Operation

Room temperature and humidity are monitored using a sensor to automatically control the operation. In tandem with the human sensor, the system enables a energy saving mode while maintaining comfort.

### Economy Mode

The unit realizes effective energy saving operation, while still keeping a comfortable cooling and heating condition.

### Auto Off

Stops the operation automatically when there are no people activity detected in the room for a certain period of time.

## Air flow

### JET Technology

Aircraft technology is used to component design the airflow system of the air conditioner.

### 3D Auto

You can choose the best cooling or heating pattern by only pushing one button.

### Auto Flap Mode

Whatever the operating mode is, the unit automatically selects the optimal angle.

COOLING & DRY  
Horizontal blowing

HEATING  
Slant forward blowing

### Memory Flap

While the flap is swinging, it can be stopped at any angle desired. The flap returns to the position that it was in when operation last stopped.

### Up/Down Flap Swing

Flap moves up and down continuously. The Up/Down flap swing can be fixed at the preferred operation angle.

### Right/Left Louver Swing

Louver moves right and left continuously. The Right/Left louver swing can be fixed at the preferred operation angle.

### Air Outlet Selection

Both lower and upper air outlets and upper air outlet can be selected.

## Clean Operation & Filter

### Allergen Clear Operation

The system is equipped to suppress the influence of the allergen caught by the filter by controlled the temperature and humidity.

### Self Clean Operation

The operation is operated for 2 hours after the unit has stopped its normal operation. The indoor unit is dried up and growth of mold is restrained.

### Allergen Clear Filter

The filter breaks down the pollen, lice, and all allergens that live on cat skins, etc. and deactivates them.

### Photocatalytic Washable Deodorizing Filter

It keeps air fresh by deodorizing the molecules causing odor. The deodorizing ability can be easily restored simply by cleaning and exposing to the sunlight.

### Removable Panel

Maintenance has been made easy as the front panel is easy to remove for easy cleaning and maintenance.

## Comfort & Convenience

### Dry Operation

The unit dehumidifies the room by intermittent cooling operation.

### High Power Operation

The unit can operate continuously in "HI POWER" mode for 15 minutes. This mode is convenient to reach the desired temperature quickly.

### Silent Operation

The sound level of outdoor units is at least 3 dB(A) lower than the nominal level.

### Night Setback

During cold seasons, room temperatures can be maintained at a comfortable level even while the room is unattended. The air conditioner keeps the temperature at 10°C.

### Weekly Timer

Up to 4 programs with timer operation (ON-TIMER/OFF-TIMER) are available for each day of the week. MAX 28 programs per week can be set.

### 24-hour On/Off Programmable Timer

By combining a start timer with a stop timer, you can register two timer operations a day. Once set, timers will faithfully start or stop the system at a specified time of the day repeatedly.

### Sleep Timer

The room temperature is automatically controlled during the set sleep mode period, ensuring that room temperature will not get too cold or too hot.

### On/Off Timer

The unit will start and stop the operation automatically at the set time.

### Comfort Start-up

In ON-TIMER operation, the unit automatically starts the operation a little earlier, so that the room can approach optimum temperature at ON time.

### Preset Operation

The desired preset operation mode can be enabled with a single touch of a button.

### Child Lock

Blocks the unit preventing tampering and inadvertent operations. This function is useful for families with young children.

### LED Brightness Adjustment

Brightness of the LED display can be adjusted to suit.

### Positioning of Installation

You can set the left-right air flow directions when you installed the air conditioner near the side wall by remote controller operation.

## Others

### Microcomputer-Operated Defrosting

This mode automatically eliminates frost, and helps minimize excessive operation in other modes.

### Self-Diagnostic Function

In the case that the air conditioner malfunctions, an internal microcomputer automatically runs a self-diagnosis. (Inspection and repair should be performed by authorized dealers.)

### Auto Restart Function

Power blackout auto restart function is a function that records the operational status of the air-conditioner immediately prior to it being switched off by a power cut, and then automatically resumes operations at that point after the power has been restored.

Outdoor operating temperature range	Cooling	°C	-15~46					
	Heating		-20~24					
Clean filter			Allergen Clear Filter x 1, Photocatalytic Washable Deodorizing Filter x 1					

\* The data are measured under the following conditions(ISO-T1). Cooling: Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB.

Heating: Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

\* Sound level indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

\* (tonne(s) of CO<sub>2</sub> equivalent) means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

## Mitsubishi Heavy Industries latest technology offers high seasonal efficiency

The new ZSX series meets outstanding energy efficiency receiving Europe's highest seasonal energy rating (A+++).

- SEER and SCOP is defined in European regulations. Please refer to P78

## Low Global Warming Potential (GWP) and High energy efficiency by new refrigerant R32

### The benefits of R32 GAS

- R32 has a GWP of 675, 68% less than R410A gas with GWP 2088.
- It requires 20% less charge compared to R410A gas.
- It provides 3% to 5% more energy efficiency compared to R410A gas.
- It complies F-gas phasedown.

## Colour variation available

User can choose the model from three different colors allowing more choice depending on the style of the room.

## Mitsubishi Heavy Industries latest technology offers high seasonal efficiency

The ZSX series meets outstanding energy efficiency receiving Europe's highest seasonal energy rating (A+++).

- SEER and SCOP is defined in European regulations. Please refer to P78

## Elegant Timeless Design

The ZSX series air-conditioners have been stylishly designed with rounded contours that fit beautifully into any of Europe's diverse interior settings. The design was created by the Italian industrial design studio Tensa srl, based in Milan, to respond to a broad spectrum of local user needs.

## Movable air inlet panel

Applying a movable air inlet panel, minimization of air resistance and advanced design are realized.

## Easy to Remote control

The wall mounted unit comes with a wireless infra-red remote controller which is used to control the unit's settings such as temperature, fan speed, heating or cooling mode.

The controller has a user-friendly design with large buttons. There are many key benefits such as eco-mode settings, which allow energy to be saved. There is also a weekly timer which can be set to your own parameters and when required for your convenience. There is also a silent mode option, which can be selected when going to sleep so there are minimal noise levels.

	Indoor	Cooling (Hi/Me/Lo/Ulo)		9.5 / 8.0 / 6.5 / 4.5	10.0 / 8.5 / 7.0 / 5.0
		Heating (Hi/Me/Lo/Ulo)		10.0 / 9.0 / 8.0 / 6.0	10.5 / 9.5 / 8.5 / 6.5
	Outdoor	Cooling/Heating		29.5 / 27.0	32.5 / 29.5
Available external static pressure			Pa	35(Initial static pressure with air filter : 5Pa)	
Exterior dimensions	Indoor	HeightxWidthxDepth	mm	200 x 750 x 500	
	Outdoor			595 x 780(+62) x 290	
Net weight	Indoor / Outdoor		kg	20.5 / 35	
Refrigerant		Type/GWP		R410A / 2088	
		Charge	kg/TCO <sub>2</sub> Eq	1.2 / 2.506	
Refrigerant lping size		Liquid/Gas	ø mm	6.35(1/4") / 9.52(3/8")	
Refrigerant line (one way) length			m	Max. 15	
Vertical height differences			Outdoor is higher/lower	Max. 10 / Max.10	
Outdoor operating temperature range		Cooling	°C	-15~46	
		Heating		-15~24	
Bottom air inlet kit (option)				UT-BAT1EF	

\* The data are measured under the following conditions(ISO-T1). Cooling: Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating: Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.

\* Sound level indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

\* 'tonne(s) of CO<sub>2</sub> equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

## INVERTER HEAT PUMP MODEL

# FDTC-VF

4way Ceiling Cassette type

Fits into standard  
600x600 ceiling

FDTC25VF, FDTC35VF,  
FDTC40VF, FDTC50VF,  
FDTC60VF

### Individual flap control system

According to room temperature conditions, four directions of air flow can be controlled by individual flap as preferred. Individual flap control is available even after installation.

FDTC-VF series can be selected for use as indoor units in the combination with SCM Multi system outdoor unit. (except 40VF)

### Flap control system

Selection of flap position is possible. Individual flaps can be set at different angles.

### 600mm Drain Pump is mounted

Drain can be discharged upward by 600mm from the ceiling surface close to the indoor unit.

It allows a piping layout with a high degree of freedom depending on the installation location.

- 'tonne(s) of CO<sub>2</sub> equivalent' means a quantity of greenhouse gases- expressed as the product of the weight of the greenhouse gases in metric tonnes and of their global warming potential.

## INVERTER MULTI-SPLIT MODEL

# Inverter Multi-split System

The Multi DC Inverter range are innovative Multi-split systems from Mitsubishi Heavy Industries Thermal Systems which offers the perfect answer for air conditioning comfort in several environments.

A single outdoor unit can air condition up to 6 different rooms. Utilising a range of compact and elegant indoor units that are available in 6 different types make air conditioning any indoor environment possible .

The whole range is characterised by high flexibility, high energy efficiency and extremely low noise levels.

Wall Mounted type  
**SRK/SKM**

Ceiling Concealed type  
**SRR**

4way Ceiling Cassette type  
**FDTC**

Fits into standard  
600x600 ceiling

Floor Standing type  
**SRF**

Ceiling Suspended type  
**FDE**

Duct Connected type  
**FDUM**

*A wide variety of  
choices for indoor units*

## OUTDOOR UNITS

Powerful, efficient and silent outdoor units are available in 8 sizes and able to combine up to 6 indoor units.

SCM40ZS-S  
SCM45ZS-S

**NEW**

Silent Operation  
is available!

SCM71ZM-S1  
SCM80ZM-S1

SCM50ZS-S  
SCM60ZM-S

SCM100ZM-S  
SCM125ZM-S

## Energy saving

All models can achieve very high seasonal efficiency thanks to the application of inverter technology which makes it possible to vary the power output according to demand for cooling or heating. This makes it possible to reach the set temperature quickly and to keep it stable over time saving about 30% in consumption compared to traditional fixed speed air conditioners.

SEER in Cooling

SCOP in Heating

\* The above values are based on indoor unit combination with SRK-ZSX-S only.

## Comfort

Thanks to the application of the Twin Rotary compressor, the outdoor units have low noise levels. All the units also operate in heating and cooling mode with an outdoor temperature limit of -15°C.

## Compact

Compact enough to be installed in areas with a limited amount of space.

# INVERTER MULTI-SPLIT MODEL

## Long piping length

The maximum piping length of the refrigerant pipes for the outdoor units, and the maximum height difference for the outdoor units are as shown below.

		SCM40/45ZS-S	SCM50ZS-S/SCM60ZM-S	SCM71/80ZM-S1	SCM100/125ZM-S
	length for one indoor unit	under 25m	under 25m	under 25m	under 25m
	total length for all rooms	under 30m	under 40m	under 70m	under 90m
height difference	lower installation spot of the indoor unit (A)	under 15m	under 15m	under 20m	under 20m
	upper installation spot of the indoor unit (B)	under 15m	under 15m	under 20m	under 20m
	maximum height difference of the indoor units (C)	under 25m	under 25m	under 25m	under 25m

Exterior dimensions (H×W×D)		mm	262×769×210		
Net weight		kg	7.6		
Refrigerant piping size	Liquid / Gas	Φmm	6.35(1/4")/9.52(3/8")		
Clean filter			—		

#### NOTES

- The data are measured under the following conditions:(ISO-T1). Cooling: Indoor temp. of 27°CDB, 19°CWB, and outdoor temp. of 35°CDB. Heating: Indoor temp. of 20°CDB, and outdoor temp. of 7°CDB, 6°CWB.
- Sound level the value in an anechoic chamber.During operation these values are somewhat higher due to ambient conditions.

Floor Standing

# CONTROL SYSTEM

## Wired Remote Control (option)

### RC-EX3

#### Advanced wired remote control

The RC-EX3 controller enables extensive access to service and maintenance data combined with easy to use full dot LCD back light display. All settings are changed by tapping the touch screen panel.

- **Economy & Timer:**  
Peak cut timer. Home Leave Operation. Energy-saving operation.
- **Comfort:**  
Hi power operation. Automatic fan speed. Outdoor silent mode.
- **Convenience:**  
Multi language settings. LCD contrast setting. Function switch. External Input/Output Function
- **Service:**  
Error code display. Operation data display. Backup Control.

### RC-E5

#### Wired remote control

The RC-E5 controller enables extensive access to service and maintenance technical data combined with easy to use functions and a clear LCD display.

- **Weekly timer function as standard**
- **Timer operation**
- **Run hour metres to facilitate maintenance checking**
- **Room temperature controlled by the remote control sensor**
- **Changeable set temperature ranges**

### RCH-E3

#### Simple wired remote control

Considering specialized usage in hotel rooms, control buttons are limited only to minimum required functions such as ON/OFF, mode, temperature setting and fan speed. It is really simple and easy to use.

- **Up to 16 units :**  
It can control up to 16 units individually, with pressing the AIRCON No. button
- **AUTO restart**  
This function allows starting the air conditioner automatically when power supply is restored after power failure or by turning on the power switch.

## Wireless remote control (option)

For wireless control simply insert the infrared receiver kit on a corner of the panel.

### Notes

- (1) It must not be surrounded by walls on the four sides.
- (2) The unit must be fixed with anchor bolts. An anchor bolt must not protrude more than 15mm.
- (3) Where the unit is subject to strong winds, lay it in such a direction that the blower outlet faces perpendicularly to the dominant wind direction.
- (4) Leave 1m or more space above the unit.
- (5) A wall in front of the blower outlet must not exceed the units height.
- (6) The model name label is attached on the rear panel.

# ENERGY EFFICIENT AND ENVIRONMENTALLY CONSCIOUS

## ENERGY LABEL – FOR EU/EEA AREA ONLY –

**SEER and SCOP is defined in European regulations listed below.**

No.626/2011 of 4 May 2011: energy labeling of air-conditioners (below cooling capacity 12kW).

No.206/2012 of 6 March 2012: requirement for air-conditioners and comfort fans.

Seasonal efficiency is the new way of rating the true efficiency of heating and cooling products over an entire year.

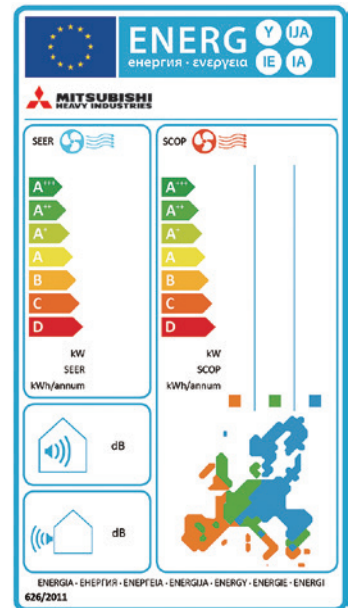

Set by the EU's new regulation implementing Eco-Design Directive for Energy Related Product (ErP) which specifies the minimum efficiency of air-conditioners manufacturers must integrate into their products.

The new Seasonal Efficiency rating system that must be used for heating and cooling by all manufacturers are;

SEER - Seasonal Efficiency Ratio (value in cooling)

SCOP - Seasonal Coefficient of Performance (value in heating)

The new rating system will indicate the true efficiency of the energy using product at specified condition.

## Employment of lead-free solder

### Adapted to RoHS directive

## RoHS: Restriction of Hazardous substances

In order to avoid the release of hazardous substances into the environments, all models have utilized lead-free solder application. It has been considered to be difficult to use lead-free solder for practical applications because it requires higher solder temperatures at assembly, which can jeopardize reliability. However our PbF soldering method can produce a higher quality lead-free printed circuit board.

## Employment of R410A R32

All models use refrigerant R410A or R32 characterized by the ozone depletion coefficient being 0.

## Excellent Energy Saving

High performance and excellent energy savings are achieved at the same time by heat exchanger's increased capacity and employment of high efficiency DC motor.

## Environmental

Mitsubishi Heavy Industries Thermal systems are unswervingly dedicated to facing the challenges of the future. Mitsubishi Heavy Industries Thermal systems are dedicated to supporting global sustainability by offering the most energy-efficient air-conditioning systems. Through our in-depth research and development we are able to incorporate new technologies within our units to maximise their energy efficiency and significantly reduce carbon emissions.

### Environmental Impact

Mitsubishi Heavy Industries Thermal systems recognises the increasing importance of reducing carbon emissions as this is becoming a priority when selecting air and water distribution systems. Furthermore new technologies are constantly being developed to help meet heating and cooling requirements as well as environmental objectives.

The future of our planet rests in the sustained evolution of humankind while caring, with love and responsibility, for all life forms that inhabit it. Therefore Mitsubishi Heavy Industries Thermal systems will continue to develop new technologies and products and will remain competitive in the market to achieve a sustainable future.

\*SEER/SCOP are based on EN14825:2016 and Commission regulation (EU) No.2016/2281.

## Before starting use

### Heating performance

The heating performance values (kW) described in the catalogue are the values obtained by operating at an outdoor temperature of 7°C and indoor temperature of 20°C as set forth in the ISO Standards. As the heating performance decreases the outdoor temperature drops, if the outdoor temperature is too low and the heating performance is insufficient, use other heating appliances as well.

### Indication of sound values

The sound values are the values (A scale) measured in a chamber such as an anechoic chamber following the ISO Standards. In the actual installation state, the value is normally larger than the values given in the catalog due to the effect of surrounding noise and echo. Take this into consideration when installing.

### Use in oil atmosphere

Avoid installing this unit in an atmosphere where oil scatters or builds up, such as in a kitchen or machine factory.

If the oil adheres to the heat exchanger, the heat exchanging performance will drop, mist may be generated, and the synthetic resin parts may deform and break.

### Use in acidic or alkaline atmosphere

If this unit is used in acidic atmosphere such as hot spring areas having high level of sulfuric gases or in alkaline atmosphere including ammonia or calcium chloride, places where the exhaust of the heat exchanger is sucked in, or at coastal areas where the unit is subject to salt breezes, the outer plate or heat exchanger, etc., will corrode. Please ask a dealer or specialist when you use an air conditioner in places differing from a general atmosphere.

### Use in places with high ceilings

If the ceiling is high, install a circulator to improve the heat and air flow distribution when heating.

### Refrigerant leakage

The refrigerant (R32, R410A) used for the Residential Air conditioner is non-toxic and inflammable in its original state.

However, in consideration of a state where the refrigerant leaks into the room, measures against refrigerant leaks must be taken in small rooms where the tolerable level could be exceeded. Take measures by installing ventilation devices, etc.

### Use in snowy areas

Take the following measures when installing the outdoor unit in snowy areas.

#### ·Snow-prevention

Install a snow-prevention hood so that the snow does not obstruct the air intake port or enter and freeze in the outdoor unit.

#### ·Snow piling

In areas with heavy snow fall, the piled snow could block the air intake port. In this case, a frame that is 50cm or higher than the estimated snow fall must be installed underneath the outdoor unit.

### Automatic defrosting device

If the temperature is low, and the humidity is high, frost will stick to the heat exchanger of the outdoor unit. If use is continued, the heating performance will drop.

The "Automatic defrosting device" will function to remove this frost.

After heating for approx. three to ten minutes, it will stop, and the frost will be removed. After defrosting, hot air will be blown again.

### Servicing the air-conditioner

After the air-conditioner is used for several seasons, dirt will build up in the air-conditioner causing the performance to drop. In addition to regular servicing, we recommend the maintenance contract (charged for) by a specialist.

## ! Safety Precautions

### Air-conditioner usage target

The air-conditioner described in this catalogue is a dedicated cooling/heating device for human use.

Do not use it for special applications such as the storage of food items, animals or plants, precision devices or valuable art, etc.

This could cause the quality of the items to drop, etc.

Do not use this for cooling vehicles or ships. Water leakage or current leaks could occur.

### Before use

Always read the "User's Manual" thoroughly before starting use.

### Installation

Always commission the installation to a dealer or specialist. Improper installation will lead to water leakage, electric shocks and fires.

Make sure that the outdoor unit is stable in installation. Fix the unit to stable base.

### Usage place

Do not install in places where combustible gas could leak or where there are sparks.

Installation in a place where combustible gas could be generated, flow or accumulate, or places containing carbon fibers could lead to fires.
